Overview

Call for Expressions of Interest: Local implementation of the Innovation Hub & Toolkit model in Tanzania and Uganda

Last updated 19 November 2026

Donor: Enabel

Reference: BEL23004

Location: Tanzania, Uganda

Deadline: 11 January 2027

Open

Purpose and scope

Enabel is the donor for the Regional Teachers Initiative for Africa - Facility and the Digital Innovation for Education Scaling Project, Window 2. The call concerns local implementation of the Innovation Hub & Toolkit model.

Its geographic focus is Tanzania and Uganda, with potential implementation in Tanzania, Uganda or both. The expressions of interest are a mapping and initial readiness exercise to inform a future Call for Proposals.

Funding

This call does not award funding or select implementing partners, and it does not lead to a contractual commitment. Any potential contractual engagement would take place through a subsequent open Call for Proposals.

No co-financing commitment is requested. Resource information in Annex A is nonbinding.

Who can apply

Expressions of interest are welcome from public authorities, academic and research institutions, teacher-training institutions, schools, NGOs/CSOs, foundations, networks, social enterprises and purpose-led private organisations. These profiles are invited to express interest in potentially operating the model in Tanzania and/or Uganda.

On behalf of the organisation, the person submitting must confirm that the information is accurate and that they are authorised to submit it. The organisation must confirm its interest in potential implementation in Tanzania and/or Uganda.

The confirmation also states that the exercise is mapping, not funding or franchisee selection, and does not confer future preferential access or automatic eligibility. Applicants confirm willingness to provide requested clarifications or later supporting information, and that stated resources are not a binding co-financing commitment.

Priorities

The call gives examples of providing a safe, accessible Hub space with digital equipment, Mobile Digital Toolkits and relevant learning resources. Examples also include power, connectivity or offline access.

Teacher support examples include needs-based hands-on training, mentoring or coaching, and peer learning linked to classroom use. Organisations may also support teachers to jointly develop, test and refine teaching ideas or prototypes addressing local educational challenges.
