Overview

2027 Open call for proposal for the implementation of SAMS activities in Central Equatoria State-Juba

Last updated 25 November 2026

Donor: WFP

Location: South Sudan

Deadline: 9 December 2026

Open

Purpose and scope

WFP is the donor for this funding opportunity, and the programme is the WFP South Sudan Country Strategic Plan (CSP). The programme country is South Sudan. The opportunity is therefore connected to WFP's CSP for South Sudan and has South Sudan as its stated programme-country scope.

The work described under the programme includes building smallholder farmers' production, aggregation and marketing capacities through SAMS activities.

Who can apply

Applicants must target at least 50% women in all activities. For FFT, the target is at least 70% women. These targets apply to the activities specified, with a different stated target for FFT.

Applicants must explain why if the applicable target cannot be achieved. For gender-targeted interventions, the representation of women and men, and girls and boys as applicable, should accord with the objectives.

Priorities

Partners must implement SAMS activities to build smallholder farmers' production, aggregation and marketing capacities. This is a required activity: the stated purpose of the SAMS activities is to build capacity in production, aggregation and marketing.

Project objectives are required to be specific, measurable, achievable, result-oriented and time-bound. They must align with WFP's mandate to feed the hungry poor, enhance food security and mainstream gender. These requirements apply to the objectives set for the project.

Each objective must link to a specific expected output or target in Part 8. Each Part 8 output or target must link to one or more Part 2 objectives. The required links therefore run in both directions: from every objective to an expected output or target, and from every output or target to at least one objective.
