Overview

Asistencia alimentaria de emergencia para los hogares afectados por el Fenómeno El Niño

Last updated 25 November 2026

Donor: WFP
Reference: WFP/PER/2026/011
Location: Peru
Deadline: 30 November 2026
Open

Purpose and scope

WFP is seeking humanitarian aid organizations for the programme “Emergency food assistance for households affected by El Niño.” The programme is in Peru and responds to the effects of El Niño on households. The call seeks partners able to contribute to emergency food assistance for affected households through the programme.

The programme may combine cash transfers to affected households and assistance to Ollas Comunes through electronic cards for food purchases. The response also incorporates nutrition, protection, accountability to affected populations and gender equality.

Funding

Its validity is six months from signature, with extension possible by written agreement. This is the period during which WFP may activate the agreement; it is separate from the effective implementation period.

Activities do not start when the Standby FLA is signed, and signature does not guarantee activation or a particular volume of activities, coverage or resources. Effective implementation may be shorter than the Standby FLA validity and is set at activation.

Who can apply

Eligible applicants are humanitarian aid organizations legally constituted and registered in Peru. Applicants must have experience in cash transfers in Peru. These requirements define the applicant organization class and its legal status.

The call also requires established relationships with communities and local governments in the priority regions. The effective implementation period is determined at activation.

Priorities

Asistencia alimentaria de emergencia para los hogares afectados por el Fenómeno El Niño

For Component 1, the call prioritises rapid deployment and reaching the greatest feasible number of households during the first month. WFP does not expect every proposal to cover the full call-wide target of 25,000 households. Component 1 proposals may cover between 5,000 and 25,000 households, concentrating in one or more of the identified regions.

Its six-month validity is not six continuous months of implementation. Any extension must be agreed in writing by both parties.

The programme prioritises Tumbes, Piura, Lambayeque, La Libertad, Lima, Ayacucho and Cusco.
