Overview

Fortalecimiento de Acción Anticipatoria en Valle de Sula por inundaciones provocadas por tormentas tropicales - Institucionalización de AA

Last updated 27 November 2026

Donor: WFP

Location: Honduras

Deadline: 7 December 2026

Open

Purpose and scope

WFP administers specialized technical services for local strengthening under the WFP Country Strategic Plan 2023–2027, Strategic Outcome 1 (SO1), in Honduras.

Funding

The duration runs from FLA signature to agreement end.

Who can apply

Applicants must implement under WFP standards and adhere to them. During implementation, applicants must maintain permanent coordination with WFP, hold periodic technical and financial reviews, exchange progress information, identify risks or delays early, and jointly define corrective actions where needed.

Priorities

The call prioritises applying humanity, neutrality, impartiality and operational independence, alongside equality, transparency, results orientation, responsibility and complementarity.

Partners must strengthen community capacity through training in disaster risk reduction, early warning systems (SAT), anticipatory action (AA), tropical-storm flood risk and climate information. SAT training must cover its four components and link them to AA and flooding. Partners must give particular attention to gender and inclusion in emergencies, link CODEL/CODEM community structures with COPECO for hydro-meteorological preparedness and response, including community monitoring, and simulate activation of AA/SAT for flooding associated with tropical storms. The programme requires updating municipal response plans and integrating AA and PSA.
