Overview

Fortalecimiento SAT y Acción Anticipatoria por Sequía 2.ª fase

Last updated 27 November 2026

Donor: WFP
Reference: WFP/HND/2026/034
Location: Honduras
Deadline: 7 December 2026
Open

Purpose and scope

WFP is seeking a partner through a Field Level Agreement (FLA) to strengthen the SAT and anticipatory action for drought under the WFP Country Strategic Plan (CSP) 2023–2027, Strategic Outcome 1 (SO1). The work is in Alubarén, Curarén and Reitoca municipalities, Francisco Morazán Department, Honduras.

Funding

The FLA runs from signature through 31 March 2027.

Priorities

Required activities include assessing SAT-M status, operational capacity and needs with municipal and departmental SINAGER authorities; holding municipal and community workshops to validate hazards, vulnerabilities, capacities and monitoring needs; and training on the four SAT components, anticipatory action, climate-information interpretation and alert dissemination. Partners must implement community messaging with local leaders, prioritising gender and inclusion, and review studies, hazard and risk maps, historical records, reports, publications and databases to identify gaps and inform SAT-strengthening recommendations.

Required activities include expanding monitoring coverage and hydrometeorological information for alerts and anticipatory action; identifying and validating monitoring sites against sub-basin characteristics, hazard exposure and information needs; and updating accessible channels, responsible actors, communication routes and response protocols for each alert level.

Required activities include establishing the multi-hazard SAT network linking institutions and communities to Choluteca basin SAT governance, and holding intermunicipal sessions with sector focal points to assign roles. Partners must structure technical, municipal and community governance: the coordination centre analyses hydrometeorological and community data for risk

scenarios and alerts; CODEM verify information, activate protocols and coordinate with COPECO Regional; and SAT-M/CODEL monitor and report hazards.
