Overview

Innovation in Cold Climate Housing Technologies

Last updated 29 November 2026

Donor: Polar Knowledge Canada (POLAR)

Location: Canada

Deadline: 19 January 2027

Open

Purpose and scope

Polar Knowledge Canada (POLAR) administers the Innovation in Cold Climate Housing Technologies Funding Call as contribution program funding for projects in Canada.

Funding

Contribution requests per proposal range from CAD 150,000 to CAD 450,000 over up to three fiscal years.

Who can apply

Eligible applicants are Canadian institutions and organizations (including academic), non-federal Canadian government departments, and Indigenous organizations with a Principal Investigator. Proposed research must be based in the Canadian Arctic, and the Principal Investigator must be based at a Canadian institution, organization, or non-federal department. Federal government departments and federal employees applying as Principal Investigators are ineligible.

Priorities

The call allows science and technology activities aligned with POLAR's Science and Technology Framework, coordination and collaboration among the polar research community, knowledge management related to polar science and research, and activities strengthening the next generation of researchers, particularly Northern and Indigenous youth. Projects involving technologies at levels 7 through 9 are encouraged.
