Overview

Advanced manufacturing for key products (IA) (Made in Europe partnership)

Last updated 26 November 2026

Donor: European Commission
Reference: HORIZON-CL4-2027-01-MAT-PROD-02
Location: Europe
Deadline: 2 February 2027
Open

Purpose and scope

The European Commission call is an Innovation Action (IA) under Horizon Europe and implements the co-programmed European Partnership Made in Europe. It funds advanced-manufacturing technology and machinery for key, high-performance products, with activities covering Europe and a European manufacturing and industrial-leadership focus. The measures aim to improve resource efficiency, circularity, productivity and competitiveness and strengthen European industrial resilience.

Funding

The indicative topic budget is EUR 36,000,000. The Commission estimates an EU contribution of EUR 6,000,000 to EUR 8,000,000 per project; this is not a ceiling, and different requested amounts are not precluded.

Who can apply

Entities established in China are not eligible to participate. Entities established in an eligible country but directly or indirectly controlled by China or by a legal entity established in China are also excluded from this Innovation Action.

Priorities

Partners must develop advanced-manufacturing technologies and machinery for key, high-performance products, minimise critical or imported material use, and increase the use of secondary raw materials, biobased materials or revalorised components. Projects start at technology readiness level 5 (TRL 5).

Advanced manufacturing for key products (IA) (Made in Europe partnership)

International cooperation is encouraged, especially with Japan or Taiwan.
