Overview

Integrating climate-related exposures into the human exposome and characterising its changes in response to climate change

Last updated 28 November 2026

Donor: European Commission

Deadline: 17 February 2027

Open

Purpose and scope

The call uses a lump-sum contribution for work-programme-designated lump-sum actions.

Funding

Total estimated action costs must exceed the estimated Union contribution. For partial Union funding, the reimbursement rates set out in Horizon Europe rules apply.

Who can apply

Applicants must base the proposed lump-sum amount on estimated direct and indirect project costs, and it must approximate beneficiaries' underlying actual costs. Where relevant, applicants must declare that they followed their own accounting practices when preparing the estimated budget.

Integrating climate-related exposures into the human exposome and characterising its changes in response to climate

Priorities

For revenue-generating actions, revenues must be included in the estimated budget and taken into account when calculating the maximum grant. Lump-sum contributions for work packages whose conditions are unmet during a reporting period are not paid in that period, but may be paid in a later reporting period if the conditions are then met.
