Overview

Industriell flexibel energistyrning med avancerad digitalisering

Last updated 29 November 2026

Donor: Vinnova
Reference: 2026-02019
Location: Sweden
Deadline: 19 January 2027
Open

Purpose and scope

Vinnova’s Project grant, within the Avancerad digitalisering programme, funds projects targeting flexible energy control in Swedish industry. The activities cover Sweden.

Funding

The preliminary total call budget is SEK 20,000,000. The contribution per proposal is SEK 2,000,000 to SEK 8,000,000. Projects last 12 to 24 months. Cofinancing is capped at 50% of the project’s total eligible costs.

Who can apply

Eligible applicants are private companies, academic and research institutions and Other relevant organisations. Applicants must be registered in Sweden. Foreign project partners may participate; a foreign partner receiving Vinnova funding must have a Swedish branch or place of business, with costs attributable to it.

Priorities

The coordinating project party is preferred as the project leader’s employer.
