Overview

Increasing Energy Efficiency of AI Systems: Strand 2

Last updated 28 November 2026

Donor: Innovate UK

Deadline: 20 January 2027

Open

Who can apply

State the organisation’s name and full registered address, and the names and full registered addresses of project partners and UK subcontractors working on the project.

Priorities

If the project involves animal trials or testing, conduct it to the highest standards of animal welfare.

Have any required permits and licences in place by the project start date.

If the proposed work involves international collaboration or engagement, provide details and list the names and countries of international project co-leads, partners, visiting researchers and other collaborators. If it involves no international collaboration or engagement, confirm this.
