Overview

Food Production Investment Program 2026

Last updated 29 November 2026

Donor: California Energy Commission
Reference: GFO-26-302
Deadline: 17 December 2026
Open

Purpose and scope

The California Energy Commission’s Food Production Investment Program (FPIP) 2026 is a grant program supporting California greenhouse-gas reductions and decarbonization, including electrification and energy resilience.

Who can apply

Prime applicants must operate an existing eligible food-processing or related-support facility where grant-funded equipment will be installed. The facility must be in California, secured and operational when the application is submitted, and meet an eligible NAICS code in the solicitation. Applicants must be registered and in good standing with the California Secretary of State. Energy aggregators or developers that do not operate the facility, California public or private universities, NAICS 111419, and agricultural production and farming activities are excluded.

Priorities

The call prioritises contributions to greenhouse-gas reductions, energy savings, electrification, grid reliability and benefits to priority populations; greenhouse-gas reductions are a key priority, and cost-effectiveness is considered. IPMVP Options A and B are strongly encouraged.

Food Production Investment Program 2026

Eligible electrification activities include replacing or converting existing fossil-fuel-powered food-processing systems to electric operation.
